

## Assistive Device Scavenger Hunt

Item	Description of consumer needs	Recommended Assistive device
1.	Frank is required to take multiple medications at different times each day. His wife has always been good about reminding him when it is time but she recently passed away and now Frank is having trouble keeping up with it himself.	
2.	Jane was diagnosed with macular degeneration and wants to have a way to communicate when outside of her home, but also needs something that will assist her with navigation.	
3.	Alex is 12 years old. He experiences Autism and is non-verbal. Alex works hard in school and especially enjoys writing stories. His parents encourage him to be as independent as possible, and wants to make certain he has a voice so he can express his wants and needs, be safe in the community, and interact with his classmates.	
4.	Sarah experiences hand tremors that makes eating out at restaurants challenging, and at times embarrassing.	
5.	Jerry's father was diagnosed with Alzheimer's and cannot remember family member's names or numbers. Jerry wants to get him a device that will allow him to be able to place phone calls to family member without the need to remember names or numbers.	

Item	Description of consumer needs	Recommended Assistive device
6.	Martin is 18 years old and is eagerly looking forward to independently, casting his confidential ballot in the next election. He experiences spastic Cerebral Palsy, and successfully completed high school by using a computer for all of his written correspondence.	
7.	Joe works in an office setting. He experiences migraines which are triggered by florescent lights and computer glare. The migraines cause him to use sick leave from work, and he is concerned about losing his job.	
8.	Tim is unable to hear on his amplified telephone that he received from TDAP. He would like to keep using his landline to communicate with family and friends, but is afraid he will not be able to since he is unable to hear them.	
9.	Mike experiences quadriplegia and uses a power wheelchair for all of his mobility. Mike lives with his wife, and takes pride in his independence. He drives himself to and from work, and enjoys the ability to control the lights, thermostat and door locks of his home as necessary.	
10.	Jan experiences blindness and uses a braille display for electronic communication. Public transportation allows her to run family errands independently. However, when grocery shopping she can't tell the difference between the cream of mushroom and cream of chicken soup.	

**Present your completed worksheet to a workshop staff member to be entered into a raffle for a chance to win a PRIZE!!!**
